Bisheshwar Seminary Inter College , *Chapra – Matriculation*

March 2015 – march 2016

WORK EXPERIENCE

Capgemini Internal Project

Created an AI tool known as Netanticipate which streamlined the entire data science workflow. This tool automated crucial tasks, including data Preprocessing, exploratory data Analysis (EDA), model selection,training, and deployment, enabling efficient and accurate Data–driven decision–making processes.

Role :
- Write Ansible playbooks and conduct linting to enhance automation and code quality.
- Debugged and refactored installation scripts to improve the Netanticipate tools deployment process.
- Involved in the setup of an OpenStack environment, showcasing their skills in infrastructure configuration.
